

Environmental Policy

Vision

At Durabuilt Windows and Doors Inc. we recognize and acknowledge the importance of environmental conservation and the protection of our environment for all people and the future of our planet. This concept is highlighted in the various proactive recycling initiatives and energy conservation programs that are in place at the Company. We are committed to an ongoing and measurable reduction in our waste byproducts that go directly to landfill, as well as documenting increases in our recycling strategies on a continual basis. Following proactive processes such as these will see Durabuilt reduce its' carbon footprint into the future.

Pledge

At Durabuilt Windows and Doors Inc. we are committed to provide quality products and service in a manner that ensures a healthy and safe workplace for our employees, as well as **minimizing our potential impact on the environment**. We will achieve these benchmarks by adhering to all relevant legislative requirements, as well as maintaining our operating systems, manufacturing processes and conservation initiatives in accordance with recognized International Standards.

Objectives

The objectives that are the fundamentals of the Durabuilt Environmental Policy are:

- Operating in strict compliance with Occupational Health and Safety Standards, as well as Environmental Protection Legislation and any & all appropriate Federal, Provincial or Municipal laws with respect to protection of the environment.
- To maintain a comprehensive recycling program concerning not only the materials used in production, but also all products and materials that are used in our facilities that can be recycled such as paper, aluminum cans, cardboard, plastics and used electronic components.
- Committed to achieve measurable reductions in our energy, water, fuel and raw material consumption.
- Structured training for all employees with respect to all of our Environment strategies.
