

A Whole New Window of Opportunity

EXCLUSIVE INNOVATIVE GROUND BREAKING UNIQUE

Effortless operation, graceful contours and of course, long lasting dependability - when you see and operate a Durabuilt window, you'll never look at another window the same again.

We proudly introduce the X-Drive casement and awning system, a result of Durabuilt's commitment to continuous industry-leading innovation.

Manufactured in North America and inspired by German engineering, technology and craftsmanship, the X-Drive offers you a *Whole*

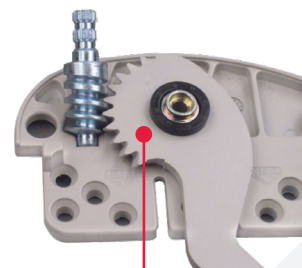

New Window of Opportunity right in the palm of your hand.

Unlike other systems that lack progressive design or long-lasting operability, the X-Drive offers homeowners, building professionals and designers unique contemporary styling and ergonomic functionality coupled with super-smooth performance and unsurpassed quality.

Go ahead, explore the X-Drive.

Effortless, Smooth Operation

The X-Drive operator is just one of the many factors that set Durabuilt windows apart from all others. Stamped steel components, housing that protects the mechanical gears and trusted manufacturing expertise allow you to take comfort in knowing that your windows will open easily and close securely day after day, year after year.

Larger and stronger gear teeth open the window in fewer turns.

Operator housing protects critical drive gears from dirt and contamination

The operator is anchored to the window on 2 planes - the base and the tower, preventing handle tilting typically seen in other windows.

Single Arm Operator

Dual Arm Operator

Patented laser cutting technology ensures components such as operator arms are consistently manufactured for years of dependability.

Split Arm Operator

Awning Operator

Beauty and Functionality Perfectly Balanced

Elegance, charm and durability are standard on all Durabuilt windows, and the X-Drive handle and cradle is anything but standard. The handle nestles gracefully in its cradle and the aesthetic design and seven available finishes will complement any décor.

X-Drive Comfort

Standard plastic handle and cradle.

X-Drive Ultra

Five stunning metal finishes.

A Sealed and Secured Window Everyday

All metal, adjustable lock bars and lock handles ensure a secure window that will stand up to years of daily use. X-Drive locking systems are made of powder coated steel - other manufacturers can't make that claim.

Powder Steel Coated Lock Bar

Multipoint Lock Handle

Standard Single-point Handle

Never Worry About a Sagging Window Ever Again

Open your windows, large or small without worrying about window sag commonly found in other windows. The high performance stainless track and powder coated bars pull your window in tighter for maximum closure and ultimately, better performance.

10" Egress Hinge

10" and 14" Washability Hinge
